

THE PEDDLER
1 9 9 7

The 1997 Peddler

**Worcester Polytechnic
Institute**

THE PEDDLER

It seems like we've been told, ever since we were kids, that the world is constantly changing around us and that some day we would be the ones to make a difference in this world and make it better. Now, as another academic year at WPI comes to an end, we find that WPI is indeed a different college now than it was when the school year started. The school has taken on a new look with President Parrish officially taking office, the renovations of Freeman Plaza, West Street, Riley Hall, and the addition of the fountain in the middle of campus, which became the topic of many a conversation. Yet, through all of the changes we have seen, we still hold our traditions near to our hearts and we have not lost sight of what is in store for us, as a university and as individuals. This is what makes the world around us and WPI an exciting and wondrous place to live and learn in this day and age.

Don't worry about failure. Worry about the chances you miss if you don't even try.

The future belongs to
those who believe in the
beauty of
their
dreams.

If you have the
courage to be-
gin, you
have the
courage
to succeed.

Ability may
take you to
the top, but
it takes
character
to
keep
you
there.

Cherish your yesterdays;
dream your tomorrows; but
live your
todays.

Without challenge, there is no achievement.

**To accomplish great things we must
not only act but also dream, not only
plan but believe.**

STUDENT LIFE

Many of WPI's yearly events are based on the school's unique traditions. The goat's head rivalry has been revived and has become an integral component of student life. While most students know the story behind the goat, fewer students know the Buckskin story. During the same era of Gompei and his goat, another animal was finding its place in WPI history.

As part of a prank played WPI's second president Homer T. Fuller, Milton P. Higgins horse Buckskin was brought to the Chapel on the third floor of Boynton by the students. Enraged, Dr. Fuller suspended everyone. The mass suspension was stopped by mathematics professor Johnny Sinclair. The Chapel was then known as Sinclair Hall. Poor Buckskin had to be lowered out of the chapel, upside-down by block and tackle.

Homecoming

Homecoming '96 was attended by many spirited alumni and students. It was a great success with several events taking place on the quad. Besides tailgating, there was face painting, the annual mini-golf, caricatures, and food. The Engineer's football team worked hard but the game ended in a loss to Union. The halftime show included the annual awards along with the addition of the most spirited student award.

Presidential Inauguration

On September 20, 1996 Worcester Polytechnic Institute inaugurated its fourteenth president. Dr. Edward A. Parrish came to us last year from Vanderbilt University where he was the Dean of the School of Engineering and Centennial Professor of Electrical Engineering. Representatives from many colleges both local and abroad attended the ceremony. The President of Connecticut College gave the address. Many of the campus's groups and clubs came to the inauguration to welcome our new president. A luncheon on the quad followed the ceremony.

Winter Carnival

The bitter cold weather didn't prevent the students from coming out and enjoying the various carnival events such as broom ball, sex squares, turkey bowling, and a chili pepper eating contest. Although there was no snow, Winter Carnival was enjoyed by the many students who participated.

Traditions Days

Traditions Days 1997 were kicked off on Tuesday night with the annual candlelight walk. Students sang their way through campus and then up to the President's house for a reception. Wednesday's rivalry events were once again a success. Although the freshmen were victorious in the pennant rush, the sophomores were the winners in both the cage ball and jeopardy competitions. The final event of Traditions Days was the Alma Mater contest

Quadfest

Rain was the forecast for Quadfest this year. Quadhazard could better have been described as Harringtonfest. Most of the events were held in Harrington Auditorium instead of the quad. The scrambler, however, braved the storm and ran all day for students to enjoy. Although the rain dampened the spirits of the participants, quadfest was still a success with many exciting events. Including sand art, velcro olympics, martial art shows, airbrushing, and of course plenty of free food.

A year in the life of WPI

The 1996-97 academic school year was a year of change and accomplishments. Renovations and construction were present in all areas of the campus. The construction of West St. was unavoidable and the renovations to Riley Hall and the Grille were welcomed. During all of the construction many students managed to achieve fame beyond Boynton Hill. Three students found a Microsoft bug. Also, swimmer Jason Wening won the gold medal at the 1996 Paralympics in Atlanta.

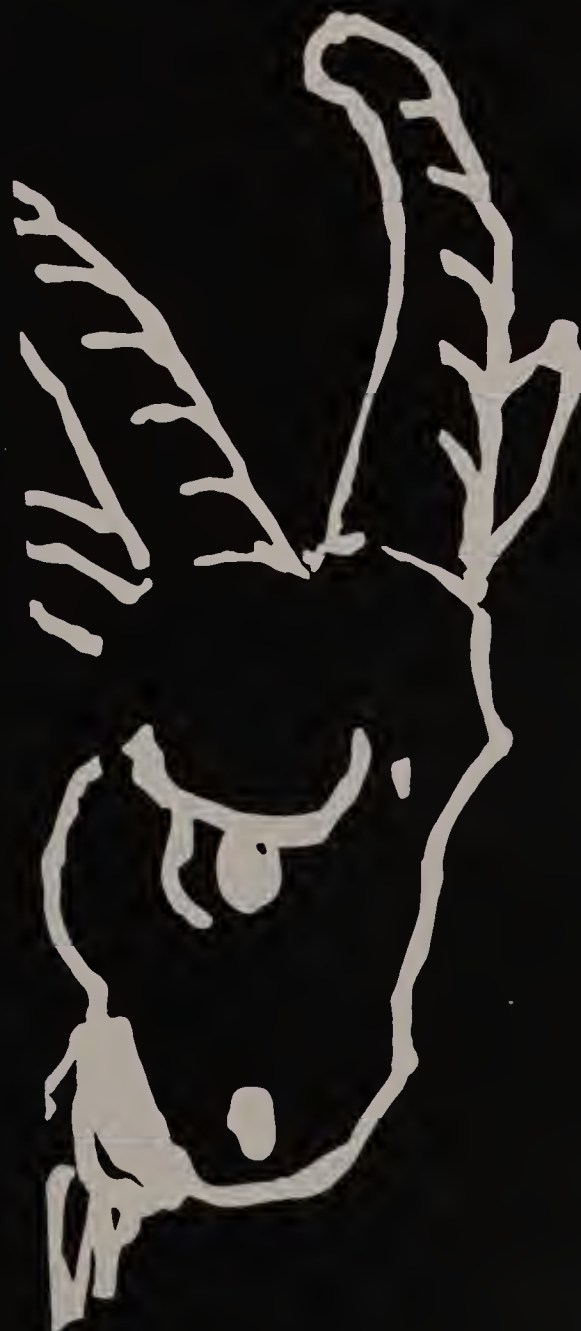

SENIORS

Yesterday lets you remember.

Today lets you live.

Tomorrow lets you dream.

SPORTS

Prior to 1894, sports at WPI, were disorganized: run only by the students who were interested in participating in them. It was in this year that Harry Dadmun became WPI's first recognized athlete. This feat was accomplished by winning the half-mile race at the U.S. National Championships with a time of just under two minutes. 1894 marked the formation of a permanent Athletic Association to oversee Tech's developing sports teams.

Football

Head Coach: Kevin Morris

Final Record: (2 - 8)

Highlights:

All Conference First Team: Brian Learned '97 - safety, Adam Abrams '98 - safety.

All Conference Second Team: Matt Suetter '99 - tight end, Pat Blais '97 - tight end.

All New England: Brian Learned '97 - defensive back, Matt Barrows '97 - defensive line, Adam Abrams '98 - defensive back,

CLUBS

Today, campus extracurricular activities are a vital component of life at WPI. The skills gained from the participation in and leadership of the nearly 100 recognized extracurricular groups on campus supplements in the education we receive in the classroom. One of our founders Emory Washburn, is quoted as saying "You must learn something about everything in order to learn everything about something."

While the value of extracurricular activities is obvious today, and perhaps to Emory Washburn, school officials have not always felt that way. Charles Thompson, the Institute's first principal said in a letter to the parents of his students "All of the time of every student is demanded for study, recitation, drawing and practice." Despite his warning, student groups began to appear on campus and thrived despite the disapproval of the teachers who regarded these activities as a waste of time.

Following the Buckskin incident during Dr. Fuller's presidency the record reads, "The faculty discouraged for sometime all forms of student activity not connected with the regular work of the institute."

Obviously, the attitudes and rules concerning extracurricular activities have gradually changed over the years, bringing us to our present level of extracurricular involvement.

GREEKS

WPI's Greek system is composed of twelve national fraternities and two national sororities. As with most extracurricular activities on this campus, fraternal organizations were not encouraged. According to Two Towers, however, it was the acceptance of the fraternities which gave WPI its unique spirit: "A sense of social well-being survived no better with this hearty fare than it had with the forbidden sweets of an earlier year. Only when everyone concerned--trustees, teachers, and students--

admitted the need for rollicking, uninhibited fellowship did the spirit, which has since become uniquely Tech's own, begin to thrive. This recognition came first with the acceptance of fraternities 'which had been strongly discountenanced.' This strong history of camaraderie began in 1886 with a Latin fraternity whose members in 1891 formed a nucleus for the later chapter of Phi Gamma Delta, Tech's first Greek fraternity."

CLOSING

"Today the Institute stands solidly atop its rounded hill, still overlooking the City and reaching toward the sky. It stands there for more than any other reason because--by some strange and wonderful supply--there have always been enough people who cared."

The 1997 Peddler Pages

Senior portraits by Davor Photo, Inc.
Publishing by Herff Jones

Well, this has certainly been an interesting adventure. The staff of the 1997 Peddler has overcome numerous obstacles in the publication of this year's book. Nevertheless, everyone on the staff should be very proud of the end result of all our hard work.

I want to take this opportunity to recognize the numerous people who have helped the '97 book along the path to publication:

Andrea Dorow, Greg Snoddy and Sandy Gately, for their advice and administrative assistance. John Miller and the staff of Plant Services for our new equipment, and beautiful new office. Dave Koelle, Ed Cameron and the rest of the Newspeak staff, for helping me clean out the office, and lending moral support. John Carrier, our Herff-Jones representative for all of his invaluable advice, and for helping this rookie editor assure that the book was actually published. Caren Corin, our Davor representative, for helping me out in a million different ways and going well beyond the call of duty to help me out of numerous crises. Mike Dorsey, our advisor for helping me sort out some of the details. Neil Norum, for providing us with a few key pictures. Finally, thanks to all the Peddler staff, for sticking with me. I look forward to working with most of you again next year. To Shawn, Amy and Karen, thanks for all your hard work, and good luck in the future.

Molly McCabe

Editor, The 1997 Peddler

ADS

“These men were called ‘Pedlars’ a word which in a hundred years would change its spelling and lose much of its prestige. In the early eighteen hundreds, pedlars were the proudest men in the land, responsible for much of the country’s distribution and communication. Sometimes pedlars acted as real estate agents, arranging for the sale of farms, livestock and lumber lots.

Pedlars were always welcome in New England...”

COLOPHON

The 1997 edition of the Worcester Polytechnic Institute *Peddler* was printed in offset lithography by Herff Jones Yearbooks, Gettysburg, Pennsylvania.

It was printed in a limited edition of 500 copies with 192 pages.

The paper stock used throughout the book is 80 lb. Bordeaux.

The cover is a Vista Screen with a burgundy material. Applied colors are black and silver foil. It is mounted on 160 point binder's board.

The endsheets are the same both front and back. They are printed in black and maroon on white stock.

The book is Smyth sewn in 16 signatures, trimmed to 9 X 12.

In addition to the black ink used throughout the book, there are eight flats of four color.

No portion of this book may be reproduced in any form without the written consent of the *Peddler* yearbook staff. For further information, contact the *Peddler* Worcester Polytechnic Institute, 100 Institute Rd.
Worcester, MA 01609.
